## Give Your Lawn a Good Start!

### Sow It In the Fall

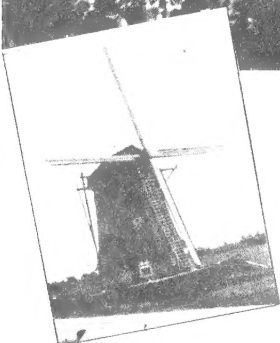

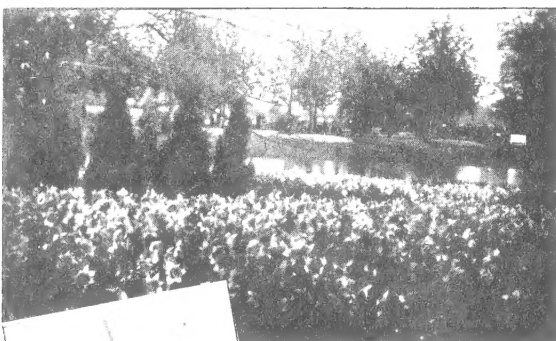

September and October are the best months for sowing lawn grass. There is usually abundant moisture for rapid luxuriant growth. Weeds are crowded out. The roots of the young grass go deep, thereby establishing the lawn against drought conditions.

MANNS' LAWN GRASSES are correctly proportioned mixtures of the very best varieties blended according to results obtained from many years of study and experience.

Sow quality seeds for economy, for beauty, for permanence.
